

Loading and unloading your bike from a bus

Always make sure your bike is free of loose items and water bottles before loading your bike on the rack. There are 5 easy steps to putting a bike on a bike rack mounted to the front of a transit bus.

Step 1. Prepare your bike for loading and tell the bus driver that you will be loading your bike. Always load your bike from curbside.

Step 2. Squeeze and pull up on the release latch to pull the folded rack down.

Step 3. Pull rack all the way down until it is parallel with the ground.

Step 4. Load the bike onto the bike rack, fitting wheels into the slots.

Step 5. Raise the support arm over the front tire to secure the bike. Never over the fender.

Tell the driver before leaving the bus that you will be unloading your bike from the rack. Raise the support arm and lift your bike out of the rack. If the bike rack is empty fold bike rack into upright position and secure. Rochester Public Transit is not responsible for bicycles or personal items lost or damaged while in transit.
